-

OPERATIONAL EXPERTISE

We design and deliver complete security programmes that integrate personnel, technology, and procedures. From access control and surveillance systems to crisis response and continuity planning, our solutions are tailored to each client's specific risk profile and operating environment.

Our services include:

- Security surveys and system evaluations
 - Development of policies and Standard Operating Procedures (SOPs)
 - Crisis management and business continuity planning
 - Tabletop and live scenario exercises
 - Staff training and capability development
-

CLOSE PROTECTION & RESIDENTIAL SECURITY

We provide highly trained personnel for both discreet and overt protection in high-risk environments. Our residential security teams deliver 24/7 protection for principals and families, ensuring safety without disrupting daily life.

OUR APPROACH

We combine experienced personnel with advanced security systems to deliver layered, effective protection. Every solution is designed to optimise resources, reduce risk, and maintain operational efficiency—supported by continuous evaluation and improvement.

STANDARDS & COMPLIANCE

Our methodologies align with internationally recognised standards, including:

- ISO 31000 – Risk Management
- ISO/IEC 27001 – Information Security
- ISO 22301 – Business Continuity
- ISO 28000 – Supply Chain Security
- ISO 45001 – Occupational Health & Safety
- ISO 9001 – Quality Management
